Projects

SmartHostel – Hostel Booking Management System

- Developed a web-based hostel booking system designed to simplify the process of selecting and booking hostel rooms.
- Created an interactive hostel and room selection interface where students can view available rooms and select their preferred room.
- Implemented student registration and login functionality along with a student dashboard for tracking booking status.
- Designed a warden workflow for reviewing, approving, or rejecting student hostel booking requests.
- Added separate interfaces for students, wardens, and administrators to manage the overall hostel booking process.
- Used Git and GitHub for version control and project management.
